### **Reasons For Allowance**

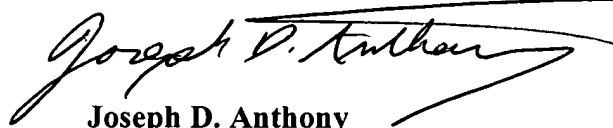

1. The following is an examiner's statement of reasons for allowance: The examiner takes as his reasons for allowance the reasons for patentability as set forth by applicant's representative in the Remarks section of the amendment filed 09/23/05. The examiner wants to point out that applicant's independent claim 1 as amended, is clearly patentable over the previous applied JP Patent Publication because JP teaches a gradual and sustained release of a detoxifying reagent whereas applicant's invention requires that the hydrophobic nanoparticle encapsulated material breaks down when it is put in contact with the hydrophobic chemical agent or hydrophobic biological agent. The said break down of applicant's "solid-water material" clearly takes place at a rate much much faster than the gradual and sustained rate taught and suggested by the applied JP Publication since the intended use of the encapsulated materials, as taught by applicant and JP are vastly different. As such, applicant's claimed "solid-water material" is deemed to have a patentable distinct structure from those encapsulated materials taught and suggest by JP.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
